## Education

### Graphic Era Hill University

Bachelor of Technology in Computer Science

CGPA: 7.7/10.0 (Till 6th Semester)

Dehradun, India

2023-present

### Vivekananda School (CBSE)

Intermediate (Class XII)

Matriculation (Class X)

Dehradun, India

77.17% / 2023

70.80% / 2021

## Work Experience

Hackathon Project (Team Lead).

Led a team of 4 developers to design and build an AI-powered campus solution during a hackathon.

## Technical Expertise

Data Structures & Algorithms, Object-Oriented Programming, Full-Stack Development, Machine Learning, Deep Learning, Generative AI, System Design

## Technical Skills

**Languages:** Python, C, C++, JavaScript

**Frontend:** React, TailwindCSS, HTML, CSS, Bootstrap

**Backend:** Flask, Node.js

**Cloud & Infrastructure :** AWS, Firebase, Render

**Databases:** MySQL, MongoDB

**Real-Time Technologies:** WebRTC, Socket.IO

**Developer Tools:** Git, Github, Visual Studio Code

## Projects

### Ambulance Response System | Live Demo

(June 2025 - July 2025)

- Designed a emergency routing system with an efficient algorithm to minimise travel time from source to destination under real time traffic conditions.
- Integrated **OpenStreetMap** for dynamic, real time navigation and route optimisation.
- Executed **automated signalling system** that notifies the **nearest traffic operator** to clear the path for emergency vehicles.
- Built **Obstacle detection and traffic handling** for seamless passage.

### Web Banking System | Live Demo

(January 2026 - February 2026)

- Developed core banking features including transactions, deposits, and statement generation.
- Implemented advanced security mechanisms with multi-factor authentication and **Role-Based Access Control (RBAC)** to safeguard customer accounts and ensure reliable operations.
- Designed a **customer-centric workflow** enabling seamless access and efficient handling of banking services across different user roles.

### RAGExtractor | Github Link

(February 2026 - March 2026)

- Built a **RAG system** with strict context-only generation (no external leakage, consistent ).
- Implemented semantic search (sentence-transformers) for accurate top-k retrieval results.
- Generated **section & executive summaries** preserving original meaning and structure.
- Created **strict Q&A mode** with Web UI, API & CLI for concise, reliable answers.

### Smart DataCenter | Live Demo

(April 2026 - May 2026)

- Built a secure Data platform for user uploads with **privacy-first architecture**.
- Applied **AES-256** encryption and hashing to protect sensitive data from unauthorised access.
- Developed a dedicated admin portal for monitoring and management of all user activity and **zero data breaches**.

## Achievements

- Participated in **Youth Speak Forum** organised by AIESEC in Graphic Era Deemed to be University.
- National-Level Hackathon Finalist – Ranked among the Top 800 out of 31,000+ teams in the Meta PyTorch OpenEnv Hackathon.
- Achieved Top 10 finalist position among 114 teams in Hackoholic 4.0 hackathon.
